-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

Amendment, filed on June 18, 2004, has been entered and acknowledged by the examiner.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 450. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on June 18, 2004 have been approved.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Faykish et al. U.S. Patent 5,656,360.

Regarding claim 11, Faykish et. al. discloses a film layer for a display comprising: a holographic film (**holographic structured layer ref. 20**), the holographic film having a front and back side; the front side of the holographic film having adjacent structures formed therein to trap at least some incident light (**embossing; col. 3 line 10**).

Allowable Subject Matter

Claims 1-10 and 15-25 are allowed.

Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed June 18, 2004 have been fully considered but they are not persuasive.

The applicant asserts that the embossing disclosed in Faykish fails to teach or suggest adjacent structures formed to trap at least some incident light therebetween. The examiner notes that the embossing created in Faykish reflects some light (col. 3 line 7), and clearly some of the incident light is going to reflect onto adjacent structures of the embossing (Figure 5 shows this very well) and some of that reflected light is going to be absorbed by the reference 20 (structured layer) or ref. 70 (spacing resin) materials i.e. that light will be trapped. The examiner does acknowledge the previous interview and the discussion regarding antireflective material, but clearly it says here in the reference that the embossing causes reflection. The examiner notes that nitrocellulose which ref. 20 can be made of is not antireflective, as new references have been found showing this.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tahara U.S. Patent 5,300,169 discloses a Transfer Foil Having Reflecting Layer with Fine Dimple Pattern Recorded Thereon. Chern et al. U.S. Patent 4,815,800 discloses Flare Reduction in Holograms. Wang U.S. Patent 6,594,073 discloses an Antistatic Optical Pellicle. Wang discloses information about nitrocellulose (col. 1 lines 51-55).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2879

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
